

C4000 SERIES

RELEASE 2.0 NOW AVAILABLE

Bogen C4000 Series

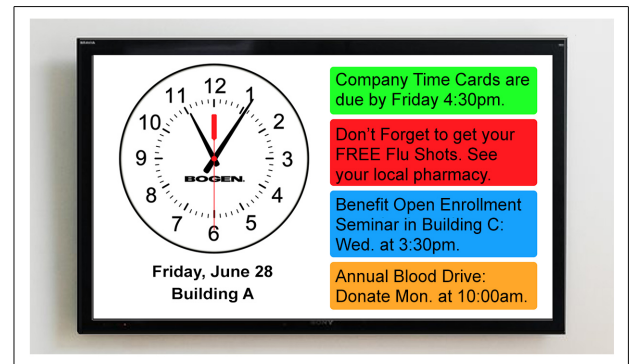

IP-Based Paging and Audio Distribution Solution for safer, better facility management

The **Nyquist C4000 ver. 2.0 Software Release** represents a significant enrichment of Bogen's award winning Paging and Audio Distribution solution. Release 2.0 adds **over 81 new features** and enhancements to an already robust platform with broad applications for the commercial audio market.

One of the most significant new features is the addition of a Routines functionality that can **support your crisis plans** for situations such as lockdowns, weather events, or emergency evacuation. The release also provides support for new Nyquist appliances shipping in January 2020, which include a 20-watt PoE+ based amplifier that converts any low-impedance speaker into an IP speaker and a new series of networked single-channel Public Address Mixer/Amplifiers.

RELEASE 2.0 HIGHLIGHTS

- **Emergency location check-in** with optional map-based audio/video room monitoring
- **Clock/Messaging Display** capability
- **User-definable routines** that allow automatic launching of a procedure, or sequence of actions based on a wide variety of triggers
- **Routines API** for enhanced integration with 3rd-party systems such as security, access control, fire, and emergency management
- **Alerts functionality** that displays both weather and non-weather-related Emergency Alert System events from the National Weather Service on video displays connected to NQ-GA10PVs
- **Password protection** for multi-site paging, facility paging, zone paging, alarms, & tones
- **Enhanced SIP trunk management**, including expanded IP-PBX connection access
- **Automated system software/firmware** checking and download

Clock/Messaging Display capability improves facility communications

Emergency Facility Check-In feature enhances building/site security
